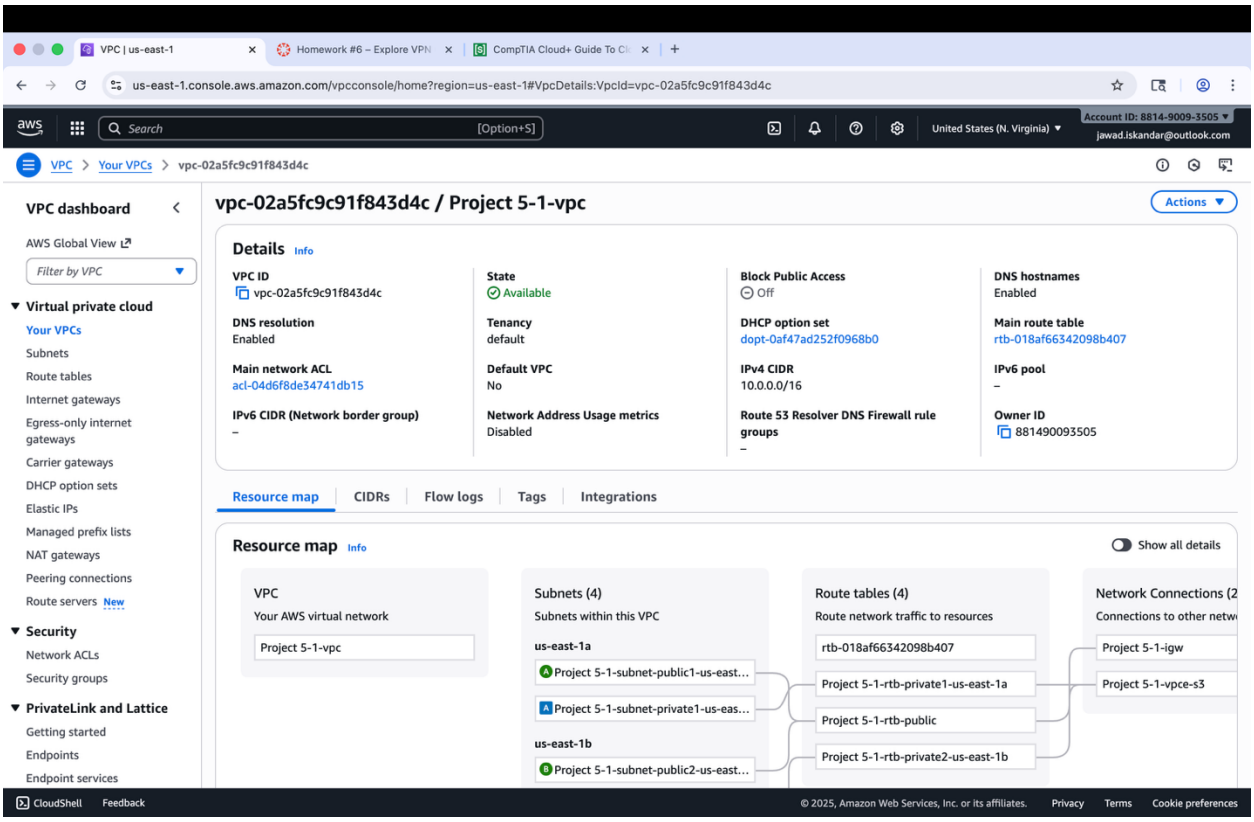
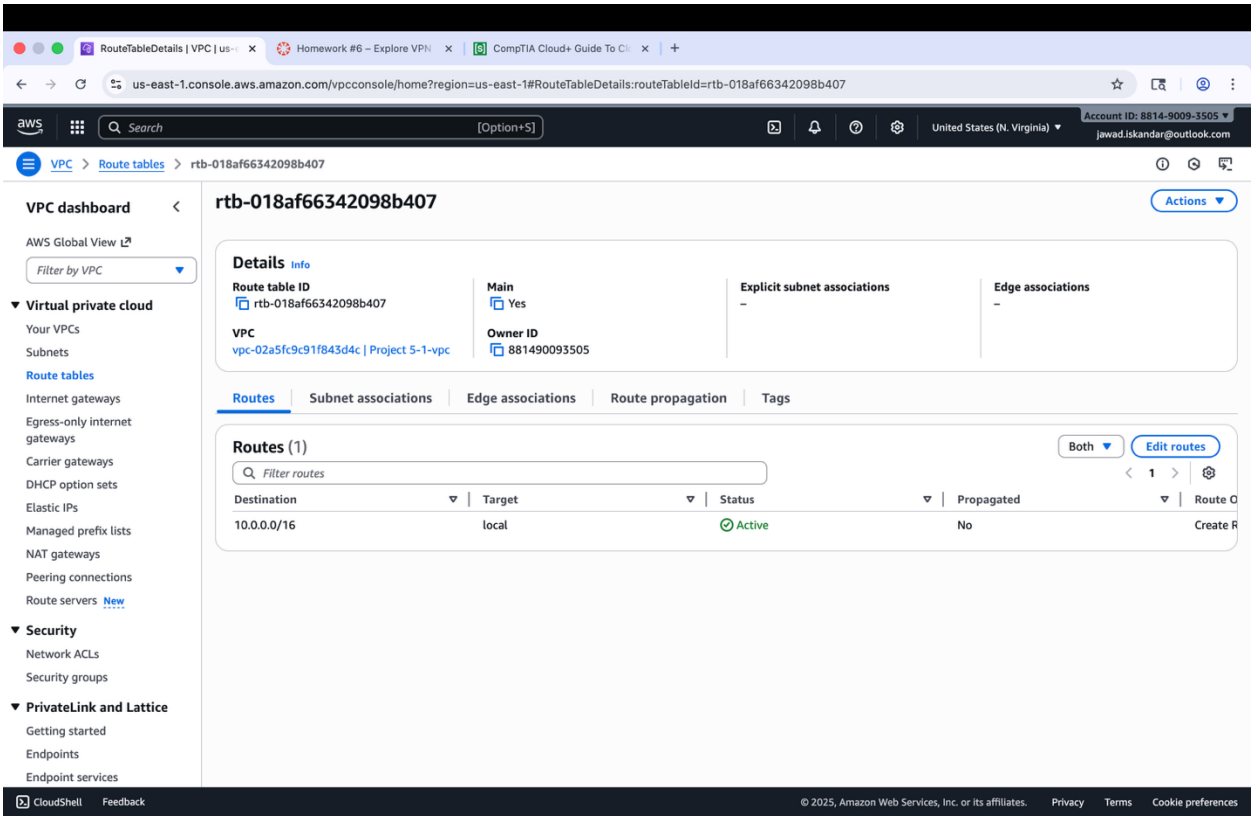
Homework #6 – Explore VPN Options in AWS

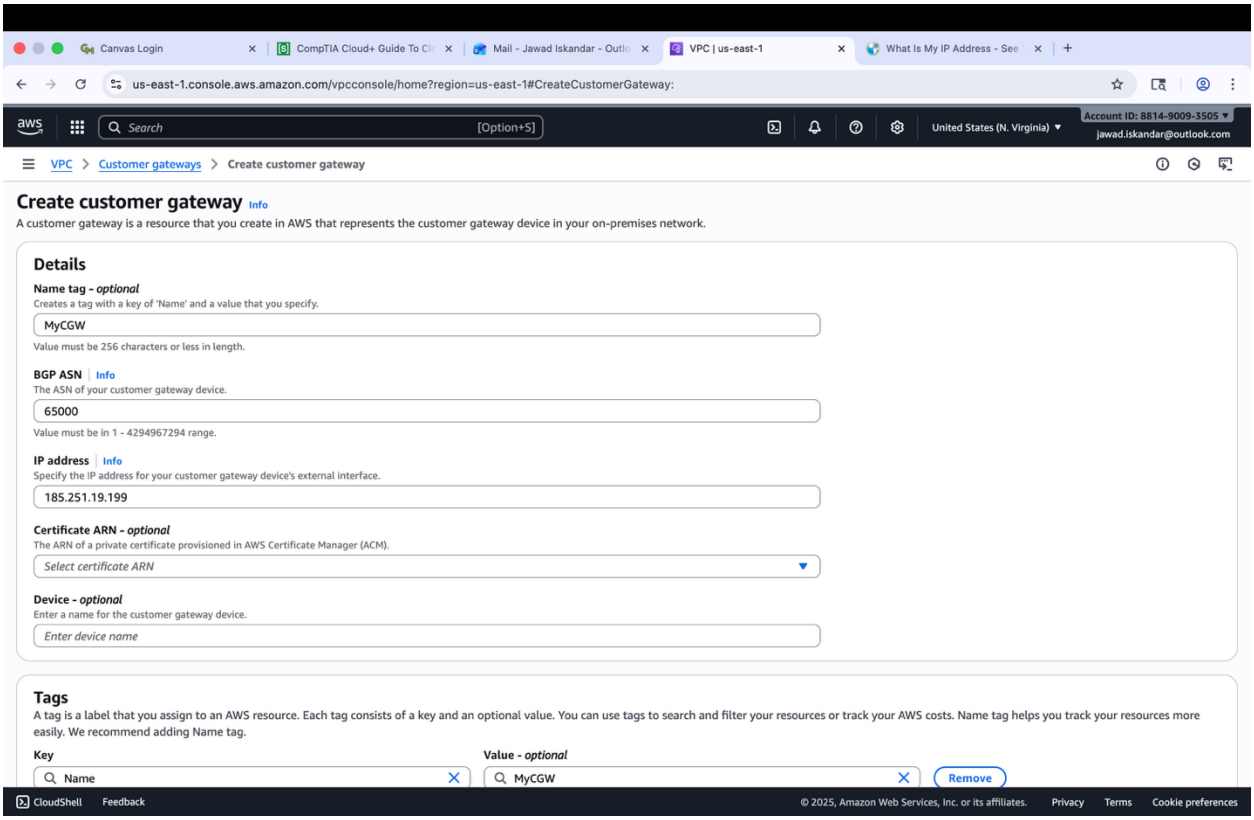
1. I used the IPv4 CIDR 10.0.0.0/16 Block



2. For the Route table I just Confirmed that this is the Main Route Table for the VPC, I did not change the name for it I kept it same.



Step 3: I am Creating my Customer Gateway and Connected my IP Adress



Step 4: I created a Virtual Private Gateway and Attached the VPC

Download configuration
Download a sample configuration based on your customer gateway. Note that this is a sample only, and that it will require modification for using Advanced Algorithms, Certificates, and/IPv6.
Vendor
The manufacturer of the customer gateway device (for example, Cisco Systems, Inc).
Generic
Platform
The class of the customer gateway device (for example, J-Series).
Generic
Software
The operating system running on the customer gateway device (for example, ScreenOS).
Vendor Agnostic
IKE version
The IKE version you are using for your VPN connection.
ikev1
Include sample type - optional
Enable
Sample type
The default sample type compatibility mode includes all options. The recommended mode restricts options to only the most secure settings (IKEv2, etc.).
