
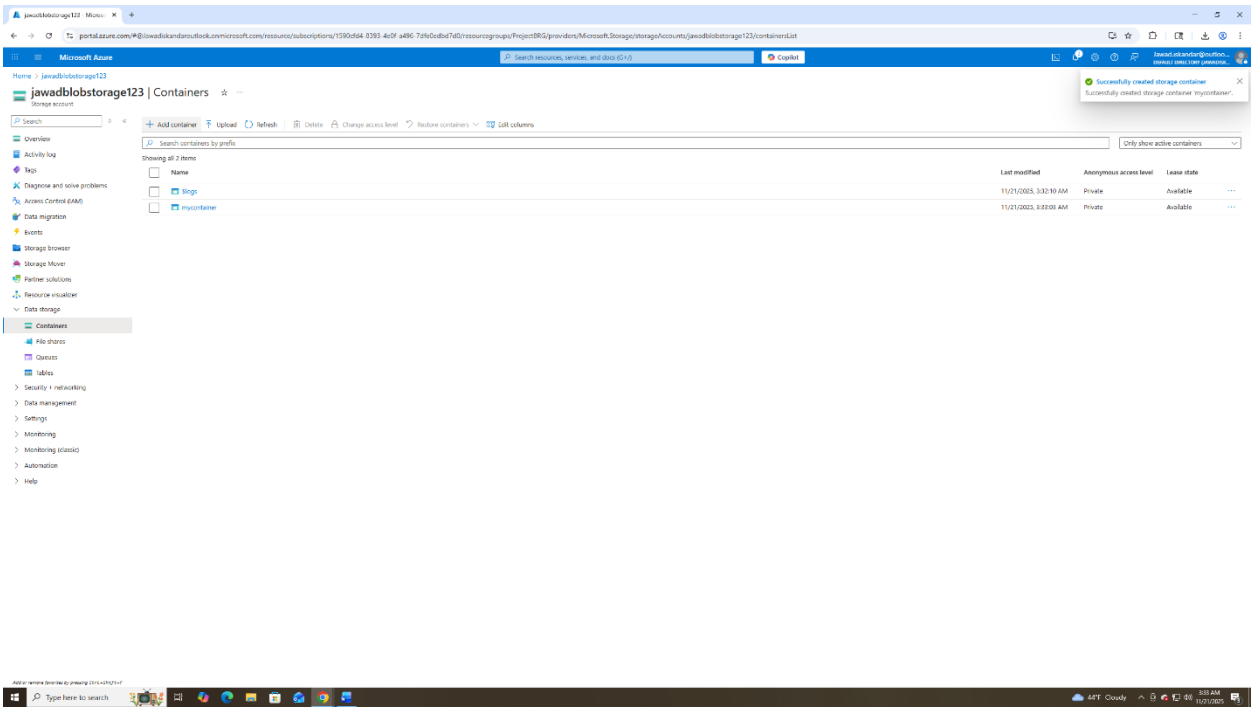
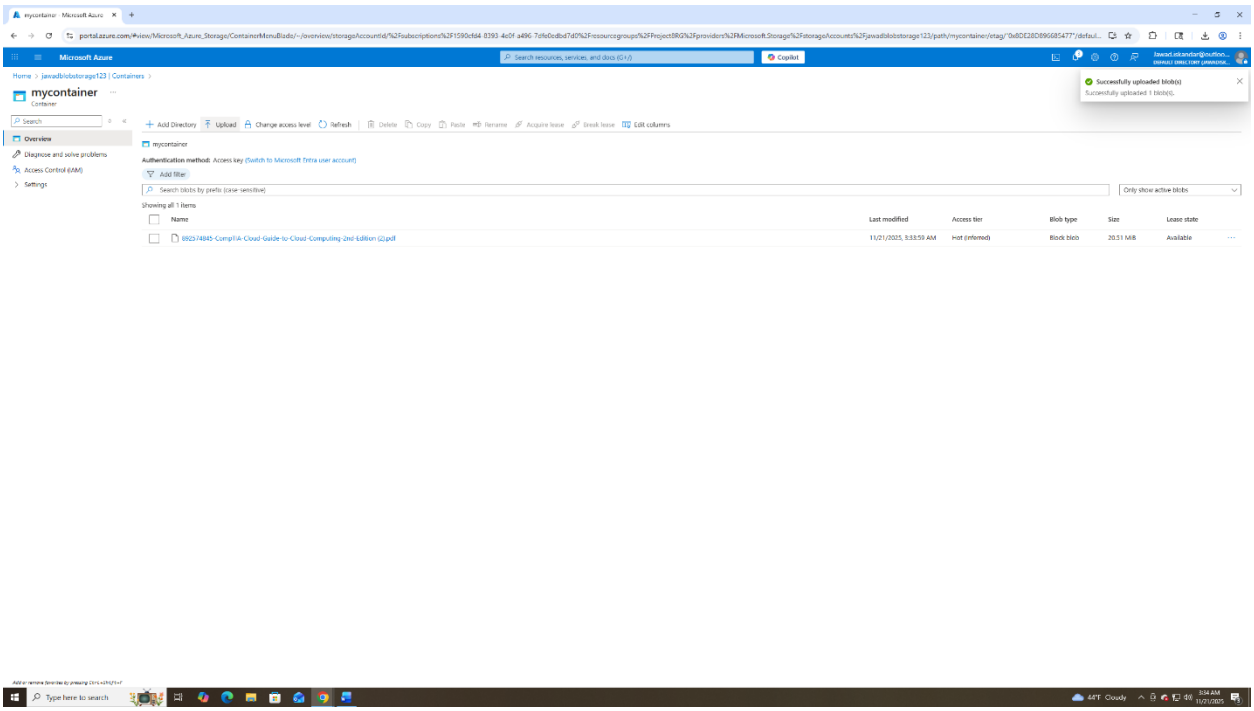
Step 2: Created a Storage Account and Connected it to

- **Containers (Blob storage)**
- **File shares (Azure Files)**
- **Queues**
- **Table**



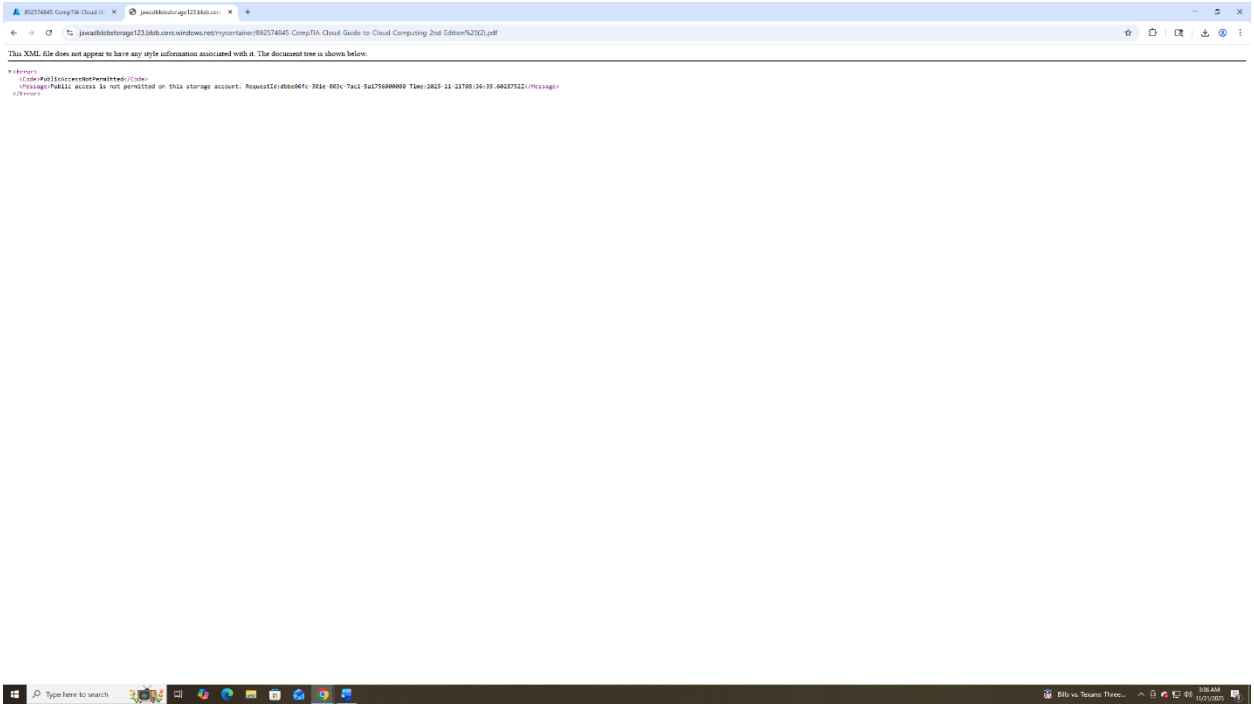
Step 3 Created Container

- Private (no anonymous access)
- Blob (anonymous read access for blobs only)
- Container (anonymous read access for containers and blobs)



Step 4: Uploaded the File into the container

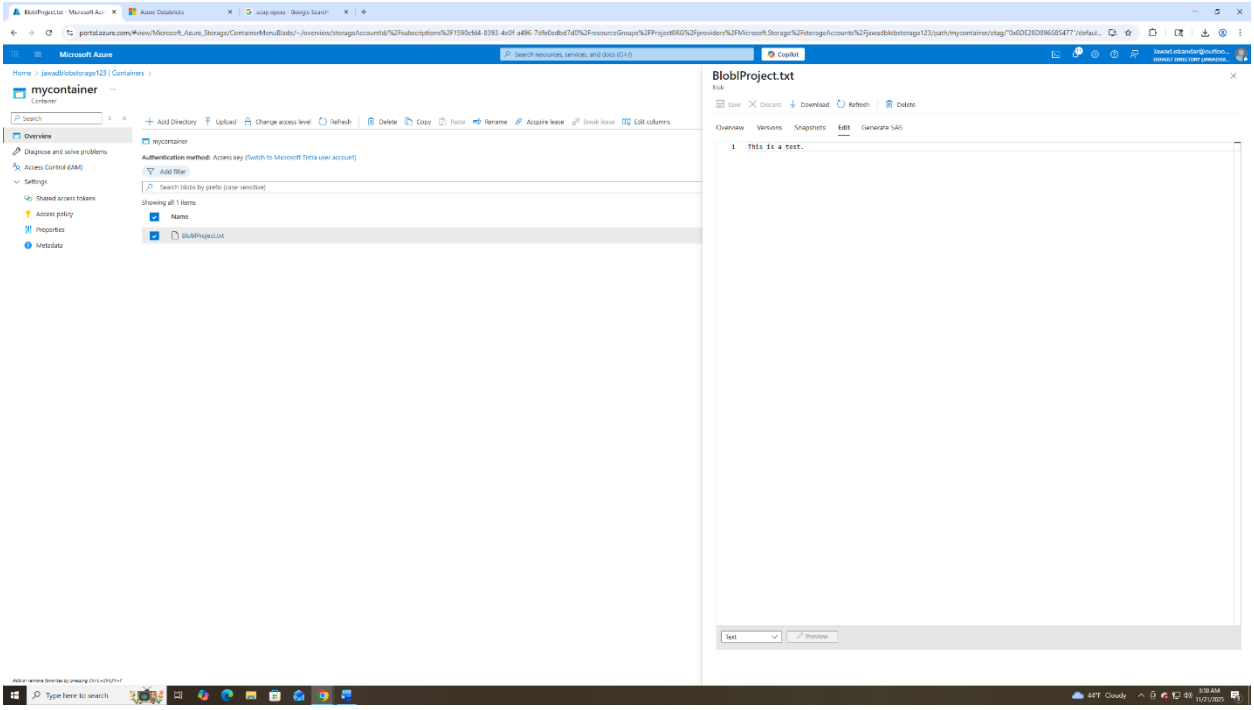
- Block blob
- Append blob
- Page blob



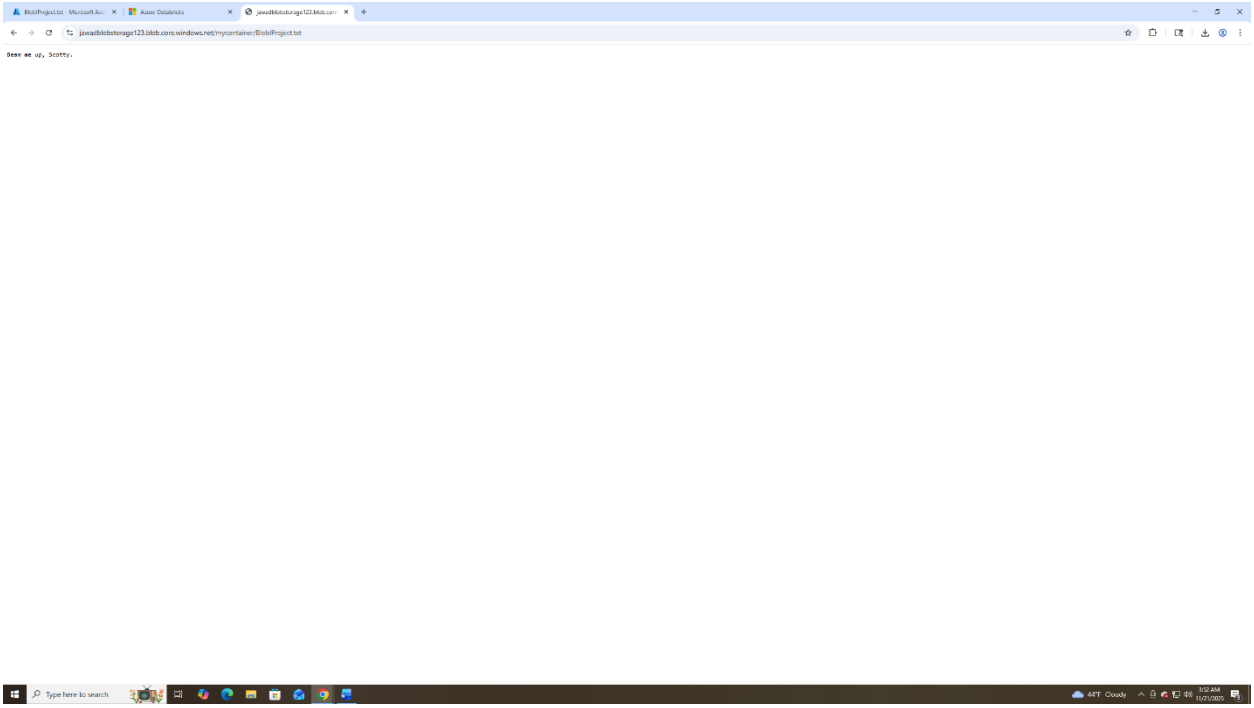
Step 5: Because the container is private:

You will get an authorization error — the file will NOT open.

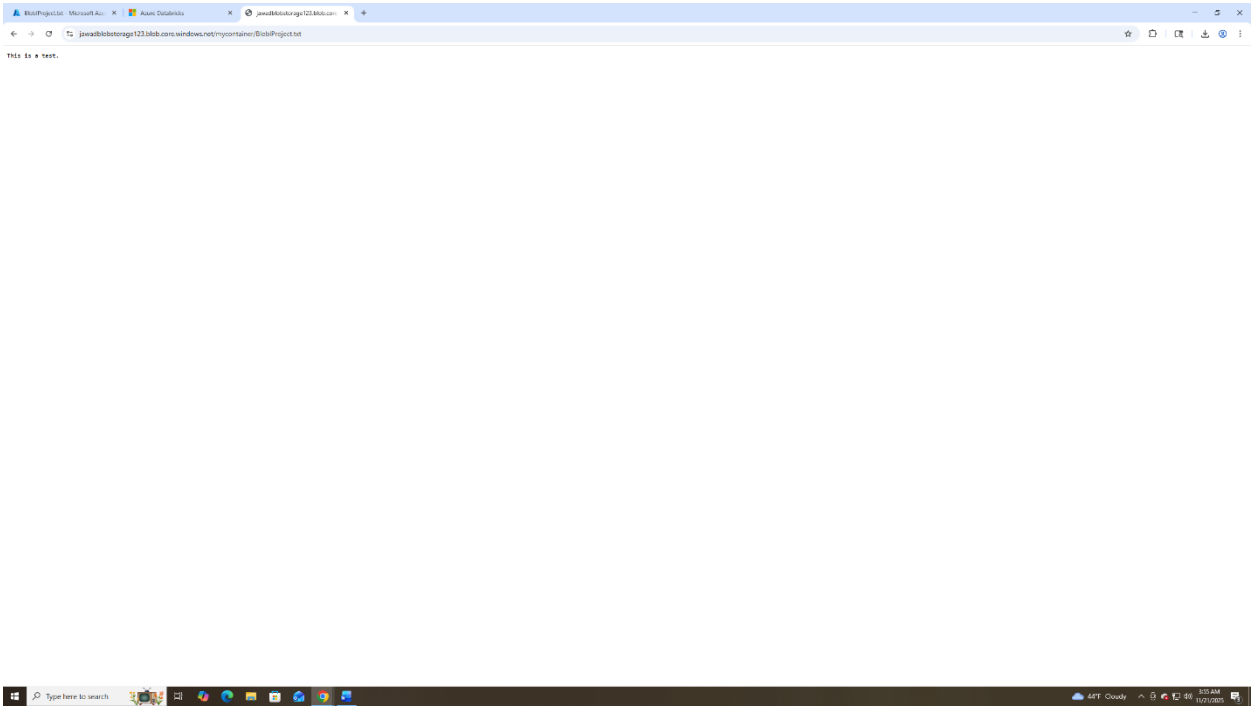
Step 6: The URL successfully worked



Step 7: I created a New Notepad Text for the and Created a Snapshot and Changing it



Step 9 : I changed the Text in the Box and have a new sentence



Step 10 : After I promoted the Azure I have
